

The Innovation & Collaboration Centre (ICC) is the University of South Australia's startup incubator.

The ICC engages with the community through the delivery of community events, workshops and programs which draw on the research and professional expertise of UniSA and our partners, to support the generation of new startups and the growth of existing companies.

The ICC is headquartered in Adelaide and has a regional centre in Whyalla, South Australia.

Job and project management software built by tradies, for tradies.

Benefits

- Powerful, customisable and easy to use
- Improves your company's bottom line profits
- Take the administration stress out of your business
- Spend more time on the job site and less time in the office

Background

Frontline BI was formed with the vision to take the stress and admin out of running a trades business, allowing companies to redirect energy into the areas that add value. Frontline BI was developed to solve a problem many tradies are all too familiar with; too much time sitting in the office doing the books and not enough time on site.

Frontline BI is a job management software that works with tradies and contractors to help effectively manage job costs and budgets, and to simplify the project management process. All aspects of the behind the scenes of the business are put into one convenient system that is fully customisable to your needs. Frontline BI allows businesses to tap into the full potential of the software by personalising it to suit their own unique business needs.

Frontline BI

FrontlineBI.com.au

Features

The software has been designed by department leaders from multiple trade companies. Feedback from technicians, operations, accounts, human resources and director personal was crucial in the development process of the software.

Some features of the software include generating sales invoices, job and project management, timesheet processing, streamline purchase order processing, supplier database integrations, KPI reports, human resource management and more.

IP status

Owned exclusively by Frontline BI and its related business entities.

Partnering opportunities

Bookkeepers, accountants, consultants, suppliers to the trades and services industry, trade associations.

Potential markets

- Any trade and service industry (plumbing, electrical, etc)
- Beachhead: Australia
- Secondary market: US and UK
- Long term: Worldwide application
